Coffee Enjoyment

# PASSIONE® OT

## CONVENIENCE AND VARIETY AT THE PUSH OF A BUTTON

The Passione® OT more than lives up to its name. Preparing the most popular coffee variations is its passion! That's why it has 10 pre-programmed coffee specialities ready for you - café crème, espresso, cappuccino or latte macchiato are prepared at the touch of a button. Six additional coffee specialities can be selected using the menu in the TFT display. The Best Aroma System ensures the flavour develops to perfection.

A wide range of features and a compact design are not mutually exclusive with the Passione® OT – there is space in every kitchen for this small and very compact coffee machine.

When passion can't wait: Passione® OT!

### HIGHLIGHTS:

#### One-Touch

What would you like? Café crème, espresso, ristretto, lungo, cappuccino or latte macchiato? 10 coffee variations are pre-programmed and you can select them directly with just one touch or with the recipe booklet feature.

#### Best Aroma System

The „Bean to Cup“ principle ensures that only the required amount of beans is freshly ground and used immediately. The pre-brewing and extraction process (A.E.S.) takes care of the perfect development of coffee flavour. The Aromasafe® lid seals tightly, to ensure that the coffee beans retain their flavour for a long time.

#### Modern compact design

No measuring necessary - the Passione® not only impresses with its beautiful design but is also so space-saving that there is room for it anywhere. The rounded edges and the high-quality stainless steel drip tray make it a discreet eye-catcher.

### UNIQUE COFFEE ENJOYMENT

#### Italian Preparation Process

Coffee? Milk? Frothed milk? What was the right order again? It's good if you know the original Italian recipes. The clever Italian Preparation Process guarantees that the ingredients are added in the right order. After all, who's able to remember that for latte macchiato the espresso is only poured after the milk and frothed milk? Incidentally, for cappuccino it's the other way round...

#### 10 Coffee varieties

Do you love variety? Your fully automatic coffee machine will fulfil many of your coffee wishes. Select the four classics - espresso, café crème, cappuccino and latte macchiato - with just one touch. Use the recipe book feature to access another 6 coffee variations - ristretto, lungo, americano, espresso macchiato, café latte and café au lait.

### INTUITIVE TO USE

#### Double Cup Mode (2 cup feature)

With the Double Cup Mode you can simultaneously prepare two cups of many coffee specialities with or without milk. Also good for those who drink a lot of coffee of course.

#### All-in-one outlet with LED lighting

Thanks to separate nozzles for coffee, milk and hot water, you don't need to move your cup while your coffee is being made. The outlet is height-adjustable up to 135 mm so that you can also use stylish tall latte macchiato glasses. A special feature - the integrated LED lighting allows you to prepare your coffee in dim light.

#### TFT colour display

The high-resolution TFT colour display lets you use the machine intuitively. The step-by-step instructions guide you through the menu in a self explanatory way.

### EASY TO CLEAN AND CARE FOR

#### Removable brewing unit

The whole brewing unit can be removed and is easy to clean. This makes the inside of the machine accessible too, so it can also be cleaned without problem.

#### Easy Steam Cleaning

Fast and hygienic - each time you make a drink with milk, your fully automatic machine offers to clean the parts in contact with milk. At the press of a button hot water and steam start cleaning thoroughly.

#### Flexible Plug-in Milk System

The separate milk unit in the outlet is completely separate from the coffee system and is easy to remove and clean, and the external dishwasher-safe milk container fits in any refrigerator.
