Coffee Enjoyment

Coffee Enjoyment

MAKE SPACE!

SOLO®

Let's be honest - how often is your customers' argument against buying a fully automatic coffee machine the lack of space at home? We have considered this argument carefully and found a solution - the SOLO®. It focuses on the essentials of a good fully automatic coffee machine - pure coffee enjoyment, maximum flavour and a rich crema. At the touch of a button it prepares the most popular coffee classics with freshly ground beans – espresso and café crème. The special feature - this high-quality technology comes in a 20 cm wide housing that fits into even the smallest kitchen.

There is always a space for the SOLO®.

HIGHLIGHTS:

A slim miracle

The Solo® is really slim - only 20cm wide! We don't need more space than that for the high-quality Melitta® technology.

Double Cup Mode (2-cup-feature)

It's better together - The Double Cup Mode allows you to make two cups of espresso or café crème at the same time. It is of course also suitable for those who drink a lot of coffee.

Height adjustable coffee outlet

The outlet is height-adjustable up to 135 mm so that you can also use glasses or extra large mugs.

UNIQUE COFFEE ENJOYMENT

Aroma Extraction System (AES)

More flavour with pre-brewing: The freshly ground coffee is moistened with water before the actual brewing process. As a result, the flavours dissolve better.

2 varieties of coffee

Enjoy the two classics espresso and café crème.

Three grinder settings

Coffee just the way connoisseurs like it - freshly ground from whole beans.

INTUITIVE TO USE

LED symbol display

It goes without saying - the LED display with red symbols makes the using the fully automatic coffee machine simple and convenient.

Individual coffee preparation

Each coffee is unique. Use the buttons to select your preferred coffee strength. And with a single turn, you can also adjust the amount of coffee to suit the size of the cup.

One-Touch

What do you prefer? Café crème or espresso? These coffee varieties are pre-programmed and you can select them directly with just one touch.

On-off switch with 0 watt feature

Economical, but not forgetful. When the 0 watt switch is pressed, the Solo® disconnects from the mains. Your last settings will of course be retained.

EASY TO CLEAN AND CARE FOR

Removable brewing unit

The complete brewing unit can be easily removed and is simple to clean. The interior of the machine is accessible and can be cleaned without any problems.

Automatic cleaning and descaling programme

Communication is everything. Your fully automatic coffee machine informs you on the display when it needs to be cleaned or descaled.

SMART SUPPORT

Download the Melitta® Companion® app to your smartphone. There you will find practical information and tutorials. Fast service is of course also available with the app.
