

Solis Scala Zero Static

TYPE 1662

Coffee grinder with premium-quality conical grinding burrs, 24 grind settings and ZERO STATIC™ technology to prevent sticky and flying coffee powder.

ZERO STATIC™ technology

Thanks to the ZERO STATIC™ technology, the ground coffee is almost completely free from static charge.

24 grind settings

24 grind settings from filter coffee and café crème to espresso.

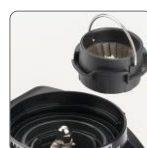

Flavour preserving

Coffee beans are ground very slowly to preserve the flavour thanks to double reduction gear.

Timer

The timer lets you control the quantity of ground coffee.

Proper cleaning

The bean container and upper conical burr can be easily removed for thorough, stress-free cleaning.

Coffee bean container

Coffee bean container is made from UV-filtering plastic with a capacity of 300 g.

Features

- + Start/stop button for manual control of ground coffee quantity.
- + Practical cable compartment in base of housing.
- + Double reduction gear.
- + Stone damage protection.
- + BPA-free plastic parts.

Specifications

Article no.:	960.88
